

Partitions for Golf Carts

Keep your course at full capacity

Golf cart partitions separate the driver and passenger to help practice social distancing. These screens can be easily installed and disassembled in less than five minutes.

- Made of clear, lightweight polycarbonate
- Attaches to cart with bungee cords
- No drilling or holes required

Ten partitions are packed in each carton. For orders of over 100 shields, please [contact us](#). For questions about this product, please contact John Parker at 770-594-1538

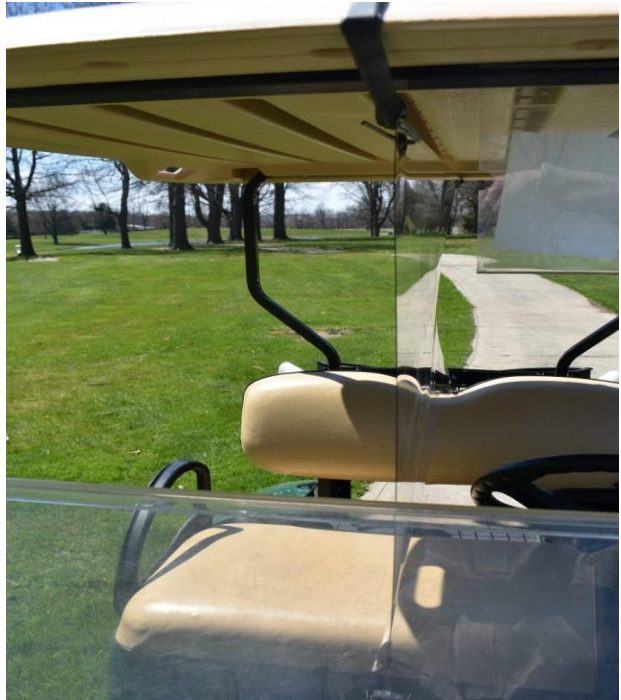

Green tape has been applied to the edges of the partition to show you the size of the shield in the cart. The tape does not come with the product. Bungee cords securely attach the shield to the cart.

Golf Cart Partition Specifications

- Current lead time: 7-10 business days
- Minimum order quantity: 10 shields
- Price: \$51/shield; shipping cost included
- One size fits most carts
- Ships in cartons via FedEx
- Dimensions: 41.00" w x 21.50" h

We have **two bungee options**. Please see table below for information.

5 Bungee System

Includes 4 small bungee cords to secure the bottom two corners and 1 large bungee cord to secure the top two corners. The large bungee straps over the roof.

Choose this option if you have a standard golf cart with a roof and four posts

8 Bungee System

Choose this option if: you are concerned with the center top strap interfering with a monitor or other accessory mounted in this area.

We cannot guarantee that the shield/bungees will fit well in your carts. However, we are happy to work with you to determine the best product for your needs. The Club Car Tempo fleet with Visage screens are not compatible with our shields.

We recommend ordering 5 bungees as they better support the shield. If you have a GPS in the top middle of the windshield, this option can still work. Some courses may prefer using 8 bungees instead. The pricing is the same for both options. The smaller bungee cords will attach to support posts and the windshield. The shields and bungees are designed to not interfere with the windshields.

Please be aware: the bungees use tension to hold the shields. Take caution during installation when handling bungees. At least two people should install each shield together. We will include instructions with each order.
